+62 812-8147-5463 jericoasan@gmail.com LinkedIn | Portfolio | GitHub Jakarta, Indonesia

SUMMARY

Highly motivated dan solution-driven Full Stack Software Engineer and Computer Science fresh graduate from BINUS University with 3+ years of practical experience in enterprise CRM development (Salesforce), WhatsApp Chatbot (3Dolphins SRM), and 1 year of hands-on Generative AI Chatbot implementation using LLM technologies on Dify.ai platform. Currently serving as a Junior Programmer within the Software Solutions Group for Customer Relationship Management at PT. Bina Inovasi Global (Bina Nusantara IT Division), contributing to end-to-end solution design, architecture, and development. Had a several experiences in developing web application using Laravel and React, with the primary focus in back-end development. Rapidly adapts to new technologies and works effectively in collaborative environments.

EXPERIENCE

Junior Programmer

PT. Bina Inovasi Global (IT Division Bina Nusantara) | 2024 - Present

- Migrated Office Hour and Holiday Dates configuration app on Salesforce from Classic to Lightning Web Components (LWC).
- Developed Initiate Chat and Follow-up List page for Telemarketing BiOn app on Salesforce using Apex and Visualforce.
- Developed Teaser Content Management System on Salesforce using LWC integrated into Binus WhatsApp chatbot (CODY) for Binus School Marketing tenant.
- Created an Apex Job Scheduler to automatically insert Chat Transcript Body into Case Object using Flows.
- Developed GenAI-RAG chatbot on Dify.ai using GPT-4o LLM model and integrated it into BHE Operational Chatbot.
- Developed an Online Payment menu for Registration form in Binus WhatsApp chatbot (CODY) for Binus School Marketing tenant using 3Dolphins SRM.
- Created an API service endpoint for Payment Status using .NET and Azure DevOps.
- Developed Gamification/Quiz feature in Binus WhatsApp chatbot (CODY) for Binus University Marketing tenant using 3Dolphins SRM.

Associate Member

IT Division Bina Nusantara) | 2023 - 2024

- Assisted in drafting project documentations, including Functional Requirement Statements (FRS), Scoping and Timeline Documentation (TLS), Release Notes (RNT), UAT Test Case, Developer Documentation (DevDoc), Detail Requirement Form (DRF), Minutes of Meeting (MoM), and Deployment Rundown.
- Designed UI mockups using Figma for BINUS WhatsApp Chatbot (CODY) journeys and custom Salesforce applications to be attached on journey documents and requirement presentations.
- Conducted black box testing during development, UAT, and post-deployment phase. Track and report bugs to developer teams.

KEY ACHIEVEMENTS

- Successfully integrated Generative AI - RAG solutions into Binus University's existing WhatsApp Chatbot (CODY), significantly enhancing user experience, operational efficiency, customer service automation, and FAQ process.
- Successfully migrated Binus' Salesforce org (fullsb and production) from Classic to Lightning Framework.
